

INFORMATION SECURITY

With the vision of “To create the best journey ahead”, Brisa, as a “Pioneer and Corporate Company”, follows all innovations about information technologies closely, performs projects that are targeted to providing and managing Information Security via analysing security and technology requirements and information security risks.

For Brisa, information is an asset that is required for creating value on market, considered strategic and must be protected. In this context, to keep our competitiveness and sustainable growth, providing availability, protecting integrity and confidentiality of our all information and information resources are among our main targets.

With this purpose, information security management system is implemented based on internationally accepted ISO 27001 Information Security Management System Standard within the company. Information security management responsibilities of all employees are defined clearly and necessary training and awareness activities are conducted for keeping information security competencies and knowledge level at desired level.
